### Project Rationale

The national priorities for the agro-silvo-pastoral sector are: (i) an increase in the sector’s productivity, (ii) an increase in the marketing rate of agro-silvo-pastoral products, (iii) an increase in the share of processed agricultural products. To achieve this, the WAATP will be in line with (i) the need to enhance the agro-silvo-pastoral potential of high-value-added growth sectors; (ii) the concern to meet the challenge of agricultural productivity and the development of value chains with high nutritional value; (iv) the promotion of employment through the development of farmer incubator centers; and (v) the development of markets at national and regional levels.

The national priority sectors are: for crop production, maize, rice, sorghum, millet, cotton, sesame, cowpeas, peanuts, fruits and vegetables; for animal and fish production, livestock / meat, small ruminants, honey, milk, local poultry, pork, fish, hides and skins; for timber and wildlife forest products, NTFPs.

The sectors concerned by WAATP-Burkina are: maize, rice, millet and sorghum, cowpea, sweet potato, cassava, fruits and vegetables (mango, plantain, tomato, onion ...), NWFPs (moringa, baobab, néré and shea butter). The livestock / meat sector will concern cattle, sheep, goats and poultry, especially in the processing component.

### Link with the PNDES

Contribute to the implementation of PNDES axis 3: increase from 15% to 25% the share of processed agricultural products

### Intervention Zone

National coverage with high concentration in large agricultural production basins

### Duration / Period

06 years

### Sector and Sub-sector

Agriculture

### Overall Objective

The overall objective of the programme is to "accelerate the transformation of agriculture by increasing agricultural productivity, creating employment for youth, facilitating access to regional markets and improving nutrition in Africa by strengthening the climate-smart regional agricultural innovation systems"

increase agricultural productivity by accelerating the massive adoption of technologies
| Specific objectives | promote innovations and technology of nutrition-sensitive agro-silvo-pastoral and fishery value chains likely to create jobs for sustainable food and nutrition security;  
| | strengthen the new innovation generation model in West Africa within the framework of the National Specialization Center - Fruit and Vegetables;  
| | strengthen the institutional framework, policies and markets  
| Expected results | 717,589 producers / processors adopt technology supported by the project;  
| | 773,484 ha of land are planted using improved agricultural technologies supported by the project  
| | 80% of innovation platforms have better access to national markets and 60% to regional markets  
| | Volumes exported by the members of the multi-stakeholder platforms supported by the project in the Burkina / Ghana / Ivory Coast corridors: onion: 980 tons, tomato 2,074 tons; and niébé: 988 tons.  
| | 108,387 producers / processors adopt technologies generated by other countries  
| Main beneficiaries | 1,087,000 direct beneficiaries affected by the project  
| | farmers working in the targeted sectors and their grassroots farmers organizations (FO) and umbrella organizations; agro-entrepreneurs working upstream and downstream and related trades along the value chains  
| Components | Strengthening the new innovation development model in West Africa  
| | Accelerating mass adoption of improved technologies and innovations and creating jobs for youth and women  
| | Support for Policy Implementation, Market Access and Institutional Strengthening  
| Maturity level (feasibility study / project document) | Available  
| | Not Available  
| Project cost | Overall cost | US$150 million  
| | Funding acquired | US$ 80 million being mobilized with the World Bank  
| | Funding sought | US$70 million  
| Type of partnership sought | Traditional financing  
| Focal point details (name of the structure, telephone, fax and E-mail) | Directorate General of Studies and Sectoral Statistics (DGESS)
